Jack Pannier

Bruno Weekender/Pannier

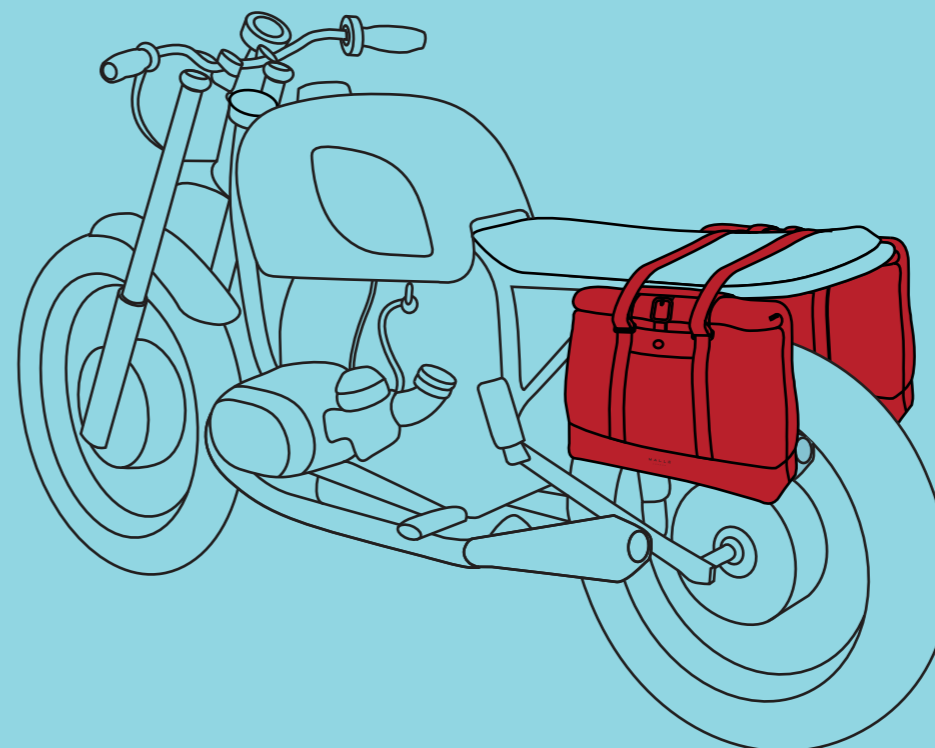

Connected Panniers

THE BRUNO/JACK PANNIER:

Our Bruno/Jack panniers are designed to be used as your daily bag that mounts to classic, modern and custom motorcycles for longer journeys. We always recommend the use of a pannier rail for secure attachment, as this will ensure ease of integration and maximum safety. These are easy to install and remove, especially when you're traveling for long distances.

INSTALLATION:

With each of our pannier bags, the moto straps simply wrap through the brass loops on each side and around the bag and pannier rail, supporting the weight of the bag. Tighten to fit and ensure there is a good distance between the bag, exhaust and the wheel. We include a pair of velcro wraps so the bag can be anchored around the side straps to a second point to ensure no horizontal movement.
